303442

ILD #980901409
LPC #01980901

Champaign Municipal
Highway 150 East
Champaign, Illinois 61821

The Champaign Municipal landfill began operation in 1965 and closed in 1976. At the present time the landfill is closed and not covered. Inspection reports since its closure indicate that leachate is flowing from the landfill into a drainage ditch.

The landfill accepted waste from the University of Illinois, City of Champaign, and the surrounding area. A review of the files showed only one incident of the landfill accepting hazardous waste documented in an Inspection Report dated August 4, 1971. During the period the landfill was in operation it is likely that more hazardous waste was disposed of at the landfill.

It is recommended that the monitor wells be tested for complete organics, inorganics and E. P. Toxic metals. The priority for inspection is rated Medium because there is leachate flowing from the closed landfill.
